CYBERSPACE (CIP)

In the past year, representatives from the various military academies and other educational institutions have been working with USCYBERCMD, Army CYBERCMD and NSA on CYBERSPACE (hereafter referred to as CYBER) education.   At the undergraduate level, work is being done to deliver cyber education at both the Academies and also ROTC commands. As we clear these cadets at the TS/SCI level, there are additional opportunities to further develop a number of ROTC Cadets, not only during the academic year but also during the summer cycle. Existing opportunities include structured summer CYBER AIAD opportunities with ARCYBER, NSA, and CYBERCMD (possibly followed by CYBER Senior Projects and Independent studies). Opportunities include:

- Cyber Combatives Training (Offense and Defense)
- Summer CYBER related education and training, such as the Joint Network Attack Course (JNAC) and the Joint Advanced Cyber Warfare Course (JACWC)
- CYBER LINGUISTICS (Foreign language and CS/IT combination)
- Realworld mission support

Location:

NSA locations at Ft. Meade, MD and Draper, UT

Prerequisites:
 1) GPA 2.5 or better; 2) meet current APFT and height/weight standards at the time of application and during attendance; 3) Enrolled in a CS, IT, Foreign Language, EE, Math or related program; 4) TS/SCI security clearance, with poly required by the time of arrival. Clearance processing will begin upon acceptance
